

Sumanth Kalayyagari

Frontend ReactJs Developer

Hyderabad | +91 7993608644 | sumanth.k.webdev@gmail.com |

Professional Summary

Results-driven **React.js Developer** with hands-on 3.2 years' experience in building scalable and responsive web applications using **React.js, JavaScript, TypeScript, HTML5, CSS3, and Redux/Context API, Micro-Frontend architecture**. Adept in **Agile methodologies, Jira tracking**, and cross-functional team **collaboration via Slack**. Proven ability to convert complex **UI/UX** designs into **functional interfaces**, resolve **security vulnerabilities**, and contribute reusable code components. Currently contributing to Omega field operations application for a major telecom client, **Verizon**.

Technical Skills

Frontend: **React.js, React-Redux, Redux-Toolkit, Hooks, JavaScript (ES6+), TypeScript, HTML5, CSS3**

Backend: **Node.js, Express.js, MongoDB, REST APIs**

Testing: **Jest, React Testing Library**

Agile & Collaboration: **Jira, Slack, Agile/Scrum methodologies**

APIs: **RESTful API Integration**

DevOps & Tools: **Git, GitHub, Jenkins, CI/CD pipelines, Postman, VS Code, NPM**

Others: **Agile, Jira, AWS, Jenkins, Slack, WinSCP**

Security: **Black Duck, Fortify**

Professional Experience

Role: **Frontend React.js Developer**

Project: **Omega Field Ops (Verizon Client)**

Tech Mahendra, Hyderabad, TG —DEC 2021 –FEB 2025

- Developed and maintained responsive user interfaces using React.js, TypeScript, HTML5, and CSS3 for the Verizon **Omega Field Ops Application**.
- Effectively managed complex application state across the Micro-Frontend architecture utilizing **React-Redux and Context API**, ensuring **predictable data flow**.

- Translated **UI/UX mockups** and wireframes into highly responsive and visually accurate web pages using HTML5 and CSS3, ensuring cross-browser compatibility.
- Resolved **production bugs** and performed regular enhancements to improve application performance
- Implemented **Micro-Frontend architecture** to modularize the Verizon Omega Field Ops application, enabling **independent deployment, scalability, and faster feature delivery** across teams.
- **Engineered API integration and asynchronous data fetching** for critical application modules using **RESTful APIs** and **JavaScript promises/async-await**.
- Actively participated in **sprint planning, daily stand-ups**, and code reviews within a **fast-paced Agile/Scrum environment**, contributing to efficient task management in Jira and transparent progress visibility.
- Optimized component rendering and API call sequences, improving perceived performance and reducing load times on data-heavy dashboard pages using tools like React Developer Tools Profiler and **React. Memo**
- Contributed to CI/CD pipeline (Jenkins) effectiveness by ensuring committed code met quality standards and passed automated checks, investigating and fixing build failures promptly.
- Addressed and mitigated security vulnerabilities, including **Black Duck issues** and **Fortify scan issues**, ensuring compliance with enterprise standards.

Project: Time Entry (Verizon Client)

- Designed and developed a centralized project management dashboard for Verizon client managers.
- Built end-to-end backend services using Node.js (Express.js) and REST API, MongoDB enabling efficient data retrieval and updates, which reduced API response time by 40%
- Enabled managers to easily assign roles and track progress, increasing operational by 60%.

Education

Bachelor of Technology (B. Tech), Computer Science and Engineering

AP IIIT RK Valley, Kadapa — Feb 2021

Relevant Coursework: Web Development, DBMS

Projects

YouTube-Clone

- Developed a fully functional **YouTube-like web application** using React.js for frontend and Firebase hosting.
- Implemented **video search functionality** using YouTube Data API to fetch and display real-time video content.
- Designed and styled responsive UI using **HTML5 and CSS3**, ensuring seamless user experience across devices.
- Managed application state using **React Hooks**, improving performance and code simplicity.
- Deployed using Firebase
